

What is the benefit of having a water filter in my fridge?

The 8171413 Filter removes :

- 99% of chlorine, sand, rust, and sediment.
- Changing the filter regularly in your ice/water refrigerator also **reduces the build-up of scale** in your ice-making mechanism thereby reducing the need for costly services.
- Overall, it provides **better tasting and smelling** water with **improved clarity**.
- The 8171413 **does not remove Fluoride**.

How do I install my new water filter?

Installing your new water filter:

- Twist the old filter a quarter-turn counterclockwise.
- Pull the filter straight down and discard (The water will turn off automatically).
- Push the new filter up into the fridge until it stops.
- Twist the filter a quarter-turn clockwise.
- Reset your "change filter" light (if your fridge has one).

Resetting your "change filter" light:

- Press the light switch (the one that the refrigerator door presses every time you close the door) 5 times within 10 seconds.

OR

- If the fridge has a filter button, press and hold it for 5-10 seconds.
