

there's more to having filtered water on tap than just convenience.

filtered water may be used for drinking, cooking, food preparation, babies, pets, aquariums, ice cubes, steam irons and any application where you use water.

The AP8000 filter system has been tested and certified to Australian Standard AS/NZS 3497 to ensure the system meets the performance stated:-

Particulate reduction

Chlorine reduction

Taste Odour reduction

Parasitic Cyst removal; Giardia and Cryptosporidium

Aqua-Pure®

WATER PURIFIERS

premium AP8000 water filter system

at around
2 cents a litre
it's just a fraction of the cost of bottled water*

do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system. if system is not used for 2 days or more, flush 5-10 litres of water through before consuming water. maximum cartridge life expectancy 12 months. life and performance of cartridge may vary, depending on volume and quality of water supply.

*based on replacement cartridge cost after system is purchased.
